We will identify the various conditions which make the rationality and objectivity of Catholic theology possible as a speculative and practical science productive of true and certain knowledge. Participants are systematically introduced to the dogmatic study of divine revelation and divine faith and to the apologetic study of the credibility of divine revelation in history. Dogmatically, fundamental theology uses a method that starts from divine revelation as accepted through divine faith. Apologetically, fundamental theology uses a method that starts from human reason and attempts to demonstrate the credibility of divine revelation and divine faith. The main goal of this course is to master the basic concepts, principles, and methods of the science of fundamental theology and to begin to practice it as an art in the service of divine truth and wisdom.

- PH 204 PHILOSOPHICAL ANTHROPOLOGY** Tuesdays and Thursdays,
 Dr. David Foster January 9 – May 10
 3 Credits 8:00 a.m. – 9:15 a.m.
 According to St. Thomas person is “that which is most perfect in all of nature.” Simply put, person is the point of creation. Thus it should not surprise us that a good account of the person is wonderfully difficult. This course examines the basic issues of our human reality: the fact of our being; the relation of body and soul; knowing; being male and female; being spiritual; our relation to society, to religion, and to death. Thomas Aquinas’ inclusive metaphysics provides a foundation for the course and the insights of contemporary existentialism and phenomenology are used to enhance it. Other philosophers incorporated are Jacques Maritain, Norris Clarke, Ronda Chervin, Conrad Baars, Francis Klauder, and John Paul II.

 3 Credits 9:20 a.m. – 10:35 a.m.
 This is the study of the nature and properties of knowledge. This course will explore the issues surrounding the questions of if and how we can know the truth; how knowledge is different from opinion, and what is the relationship between knowledge and belief. Thus this course will also address the limits of human knowledge.

- PH 206 INTRODUCTION TO ETHICS**
Deacon Tracy Jamison 3 Credits
Tuesdays and Thursdays,
January 9 – May 10
9:20 a.m. – 10:35 a.m.
- This course is a systematic introduction to the science of ethics that developed in the context of the Christian faith under the influence of the philosophical works of Plato and Aristotle and was given a definitive expression in the moral philosophy and anthropology of St. Thomas Aquinas. The Scholastic approach to ethics has undergone further refinements over the centuries and has become the normative ethical theory most closely associated with the Catholic intellectual tradition. The moral philosophy of St. Thomas defends the perennial philosophical proposal that there is an objective moral law grounded in human nature and human reason. We will examine this philosophical tradition critically and assess its plausibility and defensibility. We will also acquaint ourselves with the major normative ethical theories that are opposed to natural law theory. The topics that we will cover include the nature of happiness, the nature of the human act, the nature of the good, the nature of moral obligation, the properties of moral law, the nature of conscience, the nature of moral reasoning, and the various virtues and vices.
- PH 209 NATURAL PHILOSOPHY**
Deacon Tracy Jamison 3 Credits
Mondays, Wednesdays and Fridays,
January 8 – May 11
8:55 a.m. – 9:45 a.m.
- Natural philosophy, also called cosmology or the philosophy of nature, is the Aristotelian philosophical science that studies the general principles, ultimate causes, and universal properties of changeable being. This course examines the major competing philosophical interpretations of the nature, purpose, and methods of natural science and critically evaluates each interpretative paradigm according to its ability to organize and do justice to scientific reasoning and knowledge in general. Aristotelian philosophy of nature is presented as the integrating philosophy of science that provides the rational foundation for Thomistic metaphysics, anthropology, and natural theology, as well as the modern empirical sciences of nature. Relativism, eliminative empiricism, and pragmatism are evaluated as fundamentally opposed to the classical realist approach to nature and as inherently detrimental to the objectivity of science as such. Most popular schools of thought in our culture still assert that empirical science alone reveals the fundamental structure of reality, but many philosophers no longer have any commitment to the objectivity and rationality of any of the sciences. In general, we will explore the strengths and weaknesses of the various epistemologies and ontologies which are prevalent in our culture and influencing its attitudes and mentality. An adequate understanding of this ethos is absolutely necessary for effective Christian evangelization.
- PH 211 MEDIEVAL PHILOSOPHY**

Featured philosophers are: Anselm, Albert the Great, Bonaventure, Thomas Aquinas, and John Duns Scotus. The period excelled in the effort to harmonize faith and reason, exemplified by the remarkable synthesis of St. Thomas. It is also an era of extraordinary diversity and social turmoil.
